App Store

iJewelSlide Application is a connecting and enhancement of our software SJO Plus. It was built to provide important features of taking orders of jewellery from Customers via Digital Catalogue or Tag scanning, with the intent of helping jewellers to grow their business.

### Online

iOS

Android

Web

(Working on All Devices)

### Offline

iOS

Android

(Only for Tablet Version)

The app can serve as a secure and exclusive platform for jewelers and their authorized clientele. This Mode is Available in the form of an Application across all platforms i.e. Android, iOS, and Web.

The offline mode in the iJewelSlide application is specifically designed for order-taking, featuring a digital catalog with pre-selected design and details.

## SOFTWARE VERSION HISTORY & UPDATES

**New Release:** Developers introduce new functionalities or features to enhance the user experience. These could be improvements in design, additional tools, or enhancements that make the software more versatile.

**Performance Improvements:** Updates may include optimizations for better performance. This could involve making the software run faster, use fewer system resources, or be more efficient in handling certain tasks.
